UNIVERSAL TYPE CARTONS

Known as regular or universal type cartons, the cartons are ideal for transporting retail products and moving goods. At Rally Packaging, we manufacture universal cartons using 3' ply or 5' ply and provide you with various colour options and customization options to meet your specific requirements.

DIE CUT CARTONS

We custom manufacture quality die cut cartons to suit any of your packaging requirements. Commonly used for food and fruits storage and transportation, our cartons are made from 3' ply or 5' ply and come in 5 different colours and custom prints and are easy to assemble. We offer custom perforated lines, ventilation holes, and access points to fulfil your needs.

LAMINATED BOXES

With our high-end technology, we are capable of manufacturing laminated cartons in various colours and sizes to meet your requirements. Made from 3' ply or 5' ply the cartons features a laminated or wax outer coating which gives the box a great water-resistant ability

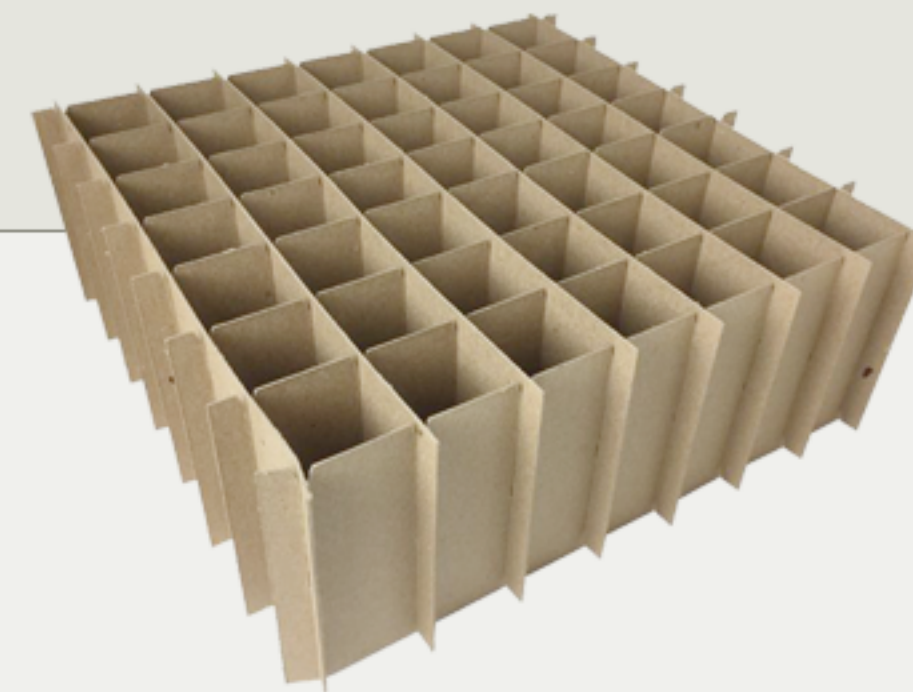

TOP AND BOTTOM CARTONS

Our top and bottom cartons can be modified with custom prints in five colours and assure you a quality product every time. The box comes in two parts can be ordered in two sizes and is suitable for packing any type of goods. In addition, we offer customise ventilation holes as well.

TELESCOPIC TYPE CARTONS

Made of high-quality materials utilizing the latest technology, we offer customizable telescopic boxes to meet your requirements. Providing you with 5 different colours to choose from, customizable printing options and ventilation hole options at Rally Packaging we assure you products worth your every penny. Telescopic boxes are the ideal option to store food products that require an even ventilated storage.

BOX ACCESSORIES

Partitions are also sometimes referred to as dividers, inserts or separators and are used to protect products of all types from damage during shipping. Partitions are either assembled or unassembled sets of fiberboard or corrugated strips which are cut, slotted and assembled to form a number of cells. These are custom made to fit current box sizes or designed from an initial concept where we can provide a box size.
